About Ganga AHS

Ganga College of Allied Health Sciences was established in 2014 with the vision of strengthening healthcare by fostering excellence in education, clinical practice and preparing competent professionals to serve society with compassion and innovation.

As healthcare continues to advance, the institution remains committed to developing skilled and competitive Allied Health Professionals who contribute meaningfully to the well-being of individuals and communities. With dedication, commitment and continuous growth, the institute currently offers 6 Undergraduate and 1 Postgraduate programme.

Within a short span of time, the institution has achieved remarkable progress in infrastructure, academic quality and clinical training. Today, the students of the Allied Health Sciences Department play a significant role in patient care at Ganga Hospital, gaining extensive clinical exposure and hands-on experience. *Ganga College of Allied Health Sciences is the first institution in Coimbatore to successfully obtain the EOMS standard certification, reflecting the high quality of its academic processes and management systems.* With ongoing developments and advancements, the institution continues to successfully provide quality healthcare education.

Spotlight

Neurological emergencies such as stroke, traumatic brain injury, status epilepticus, spinal cord injury and acute neuromuscular crisis demand rapid recognition, timely intervention and coordinated multidisciplinary care. The concept of the "Golden Hour" highlights the critical period during which prompt assessment and evidence-based management can significantly improve survival, reduce disability, and enhance long-term neurological outcomes. As advancements in neurocritical care, emergency medicine, rehabilitation and technology continue to evolve, healthcare professionals must be equipped with the knowledge and skills necessary to respond effectively across the continuum of care.

Objectives

To enhance knowledge on the timely management of neuro-emergencies.

- To emphasize the importance of the golden hour in improving patient outcomes.
- To update participants on recent advances in neurocritical care and rehabilitation.
- To promote multidisciplinary collaboration in neurological emergency care.
- To encourage research and evidence-based practice in neuroscience.
